

# Ex. 1 Recap

Q1: Can you find an example of a file and of a directory? Are any of the files executable? What is the size of the largest file?

Q2: Do you have a hidden directory called “.ssh”?

*Answer: Macs will already have a .ssh folder, but Windows computers will not.*

Q3: Are there any files/directories in testdir?

*Answer: Hopefully not, you just created it.*

Q4: Is the testdir folder gone?

*Answer: No. An error message says it is not possible, since the directory is not empty.*
